Preston Eastin
Positioning Solutions since 1972

2-Axis Positioners
Efficient and precise welding depends on the right positioning.

**PrestonEastin** two-axis welding positioners are ideal for construction, OEM, oil & gas, and contract manufacturing applications where increased efficiency and safe operation is strongly desired. Our robust product line delivers precise, repeatable, and safe operation. Better positioning yields higher quality welds, improved productivity, and a lower risk of operator injury.

Rotational Torque Calculation
1. Determine total weight of work piece, including fixtures.
2. Calculate the load center of gravity distance (LOAD C.G.) in inches, from center of table.
3. Multiply information from step 1 times the information in step 2 for required rotational torque.
4. Compare the required rotational torque with the rated rotational torque from the table.
5. Select a positioner with a rotational torque rating equal to or greater than the required rotational torque.

\[
\text{LOAD X DISTANCE = ROTATIONAL TORQUE REQUIREMENT}
\]
\[
\text{(LBS.) X (INCHES) = (LBS. – INCHES)}
\]

Tilt Torque Calculation
1. Determine total weight of work piece, including fixtures.
2. Calculate the load center of gravity distance (LOAD C.G.) in inches, from the table face, including the fixture.
3. Add inherent overhang distance (INH. OH.) in inches to step 2.
4. Multiply information from step 1 times the sum of step 2 and step 3 to determine the required tilt torque.
5. Compare the required tilt torque with the rated tilt torque from the table below.
6. Select a positioner with a tilt torque rating equal to or greater than the required tilt torque.

\[
\text{LOAD X DISTANCE + INHERENT OVERHANG = TORQUE RATING}
\]
\[
\text{(LBS.) X (INCHES) + (INH. OH.) = (LBS. – INCHES)}
\]
PA-1 MT, 2-Axis Welding Positioner

The PA-1 MT, 2-Axis Welding Positioner is ideal for construction, OEM, oil & gas, and contract manufacturing applications. It delivers precise, repeatable, and safe operation. Better positioning yields higher quality welds, improved productivity, and a lower risk of operator injury.
